

# Mehmet Kutluay

DATA SCIENTIST

Amsterdam/Rotterdam - The Netherlands

+31 685478120 | mehkutluay@gmail.com | YMehmetKutluay | mehmet-kutluay-phd

## Skills

### DATA SCIENCE

- Time Series Data, Cross-Sectional Data, Networks, Anomaly Detection, Data Visualization, Data Wrangling, Dashboarding, Docker, Spark

### CODING LANGUAGES

- Statistics/Data Science: R, Python, Matlab
- Other: Latex, Microsoft Office, Markdown

## Experience

### ING Bank N.V. - Financial Crime Analytics

Nov 2019 - present

DATA SCIENTIST

Amsterdam

- Part of a big team of 40-45 FTE's that develop models to detect money laundering and other illegal financial activities
- Creating two containerized (via Docker) Python packages for: 1. streamlined unsupervised anomaly detection and 2. extracting network features from transaction data
- Communicating with other end-users of the Python packages for further development
- Running workshops on day-to-day usage of Docker
- Coaching trainees in data science work

### ING Bank N.V. - Finance Analytics

Feb 2018 - Nov 2019

DATA SCIENTIST

Amsterdam

- Part of a small team of 2-3 FTE's that service employees in Group Finance through analytics projects. All projects are centered around time series data cleaning, wrangling and forecasting
- Created three R packages for time series forecasting, detecting/correcting anomalies and data exploration
- These R packages are open sourced and maintained by me. Click for tstoools, tsclean, tsforecast
- Running workshops and trainings in R, Python and statistics
- Coaching trainees and interns in data science work
- Engaging stakeholders to help them become more data-savvy and understand what they can (and can't) do with data science

### VU University Amsterdam

Sep 2014 - Aug 2018

PHD RESEARCHER IN ENVIRONMENTAL ECONOMICS

Amsterdam

- Thesis title: 'The Value of (Avoiding) Malaria' (link, graduated 2nd of May 2019)
- Supervisors: Roy Brouwer & Richard Tol
- Links to completed papers:
  - Valuing malaria morbidity (link)
  - Preference updating in public health risk valuation (link)
  - Public preferences and valuation of new malaria risk (link)
  - Attitudes towards public health spending (link)
- This was financed by an EU FP7 project: HELIX (link). This involved multidisciplinary collaboration with researchers from mathematics, physics, engineering, geography and sociology. I organized and executed a field survey in Mumbai, India between March - June 2016 as part of this project. Some analyses of the data from this survey can be found on my GitHub page.

### VU University Amsterdam / Tinbergen Institute

Sep 2013 - Feb 2018

TEACHING ASSISTANT

Amsterdam

- Courses: Statistics/Econometrics (masters level - including coding in SPSS and R), Mathematics (masters level - linear algebra and advanced calculus)

## Education

### Amsterdam/Rotterdam, The Netherlands

Sep 2012 - Aug 2014

MPHIL IN ECONOMICS

Tinbergen Institute

- Specialization: Applied micro-econometrics
- Thesis: 'What explains willingness to pay for avoiding morbidity risk due to malaria? Results from a global meta-analysis' (later on became first chapter of PhD thesis)

**Ankara, Turkey**

BSc IN ECONOMICS

- Specialization: Academic (i.e. a special focus on applied mathematics and statistics)

*Sep 2008 - Jun 2012*

*Bilkent University*
